

BPW BRAKE DISC & DISC PADS

There is no difference between BPW original equipment and BPW genuine replacement parts.

FEATURES

- Optimally matched friction pairings of the brake disc and pads.
- Special BPW disc alloy for high resistance to wear and cracking.

BENEFITS

- Symmetrical wear throughout the entire disc pad service life.
- Increased disc surface area for optimum heat dissipation.

Performance. Reliability. Security.

BPW sets the benchmark worldwide for no-compromise top quality products which meet the highest demands for quality and reliability. BPW original parts are continuously being developed and offer you the security of knowing they are built to match your running gear.
