PAVING THE WAY FOR PERFECT PRESSURE.

BPW TireMonitor

9 BAR

The smart solution for optimal tyre pressure.

The BPW TireMonitor makes it extremely easy to always set the optimal tyre pressure.

This can save you operational costs of up to €1,000 per vehicle each year thanks to the lower fuel consumption and reduced tyre wear. The BPW TireMonitor (TPMS) is made up of individual sensors that are attached to the wheel rims and transmit the tyre pressure to a receiving unit at an accuracy of up to +/- 0.3 bar. The data can then be displayed using an app or the cargofleet telematics platform.

WHAT YOU NEED TO KNOW

- › The BPW TireMonitor (TPMS) can be fully integrated in the BPW cargofleet telematics platform and the Driver app can also be used to display the information.
- › You can use up to 36 sensors with a life expectancy of up to 7 years.
- › The sensors have an accuracy of up to +/- 0.3 bar.
- › The system can be fitted on all commonly available wheel sizes without the need for tools.
- › The BPW TireMonitor (TPMS) is suitable for use in new vehicles and for retrofitting.

IMPRESSIVE BENEFITS

- › You reduce your fuel consumption and tyre wear.
- › You minimise the downtime caused by tyre blow-outs.
- › You ensure that your vehicles are safer on the roads.
- › You have access to all the information at all times, wherever you are.
- › You motivate your drivers to regularly check the pressure of their tyres.

THE BPW EFFECT

€1,000

annual savings per truck*

* At average fuel consumption and prices, mileage of 120,000 km
