BPW genuine spare parts

GENUINE QUALITY MAKES A DIFFERENCE.

ONLY THE ORIGINAL IS GENUINELY THE BEST.

Genuine BPW quality should always be the first choice – especially when safety is at stake. The quality of brake discs is determined by a combination of design, materials, and machining. The chemical composition of the materials in particular governs numerous characteristics and therefore significantly influences the product's attributes.

BPW has been giving consideration to these technological relationships for many years while developing brake discs and aligning them with trailers' operating requirements. Genuine BPW brake discs dissipate heat very effectively thanks to their enlarged surface area while improving heat distribution and improving internal air flow by way of a venturi effect. In addition, they are perfectly matched to BPW brake pads and highly resistant to wear.

QUALITY AND SERVICE IN EVERY DETAIL.

By choosing BPW genuine spare parts, such as genuine replacement brake discs and pads, you can enjoy the original quality benefits of your axles even after many years of service.

Genuine brake discs and pads are available only from BPW. BPW replacement discs and pads are identical to the OE parts installed in the BPW disc brakes that we supply to vehicle manufacturers. Thanks to careful friction pairing of the brake discs and pads, BPW brake components offer the best possible braking and wear behaviour.

Although difficult to distinguish from the original by appearance, most non-genuine parts are unable to satisfy these exacting requirements. If the composition of the brake pad is too aggressive, for instance, cracks in the brake disc and elevated pad wear can occur. The inevitable outcome is a greater danger of brake failure.

For this reason, always insist on the genuine product. Ask your BPW authorised dealer about genuine spare parts for BPW disc brakes.

ALSO TAKE A LOOK AT OUR OTHER BPW GENUINE SPARE PARTS:

BPW DRUM BRAKES

Safe in every situation.

- Brake lining wear indicator.
- Wearing edge on brake drum.
- Perfect pairing of brake drums and linings.

IMPRESSIVE BENEFITS.

Easier and quicker brake servicing
thanks to intelligent details. +

Careful friction pairing
(brake discs and pads). +

Lightweight design. +

Special BPW disc alloy for high
resistance to wear and cracking. +

BPW ANTI-FRICTION BEARING GREASE

Expertise ensures long service life.

- Excellent lubricating effect for reduced bearing wear.
- Very good adhesion even at elevated temperatures.
- Highly effective protection against wear prolongs service life of the entire bearing.

+ Sensitive response, good control and minimal heat fade.

+ Symmetrical wear throughout pad service life.

+ Technical customer service & support.

+ Effective heat dissipation achieved by proven flanged disc concept and enlarged disc surface area.

+ Reduced stockkeeping because brake discs are identical for 0 and 120 offset.

BPW AIR BAGS

Quality capable of withstanding any pressure.

- Perfect fit and simple installation.
- Designed according to BPW specification.
- Economical solution thanks to long service life.
