BPW genuine spare parts

# GENUINE QUALITY MAKES A DIFFERENCE.

# ONLY THE ORIGINAL IS GENUINELY THE BEST.

Genuine BPW quality should always be the first choice – especially when safety is at stake. BPW air bags are tailored exactly to the needs of BPW running gear as regards load capacity, required installation space and spring characteristics. Patented pistons made from a highstrength plastic not only optimise the weight of the BPW air bags, but also enable them to withstand extreme loads.

Many air bag suppliers offer pistons with other load capacities and spring characteristics because they are unfamiliar with the original specification. Investigations have shown that non-genuine products can fail upon exposure to high loads. Such occurrences can give rise to unscheduled repairs and vehicle downtimes that erode the cost benefits of non-genuine parts. Save yourself unnecessary annoyance and costs. Insist on genuine BPW air bags – you know you can trust in the reliability, durability and economy of BPW.

**GENUINE SPARE  
PARTS.**

# QUALITY AND SERVICE IN EVERY DETAIL.

BPW spare parts represent an investment in the safety of your vehicles and their cargo. It therefore makes good sense to insist on genuine BPW air bags.

Europe alone is home to more than 20 producers of trailer axle air bags that are difficult to distinguish from the BPW original by appearance. In many cases, however, they do not satisfy BPW's exacting requirements. Some imitators copy BPW air bags by simply measuring the components, but only BPW fully understands the specific properties that are essential for withstanding the stresses to which BPW running gear is exposed.

In collaboration with premium manufacturers of air bags for commercial vehicles, over the years BPW has developed a range of products tailored exactly to the needs of BPW running gear. We not only give you our word, but also accept liability for our products. The BPW logo on the air bags gives you the security of knowing that your vehicles are protected by genuine BPW quality. For this reason, always insist on the genuine product. Ask your BPW authorised dealer about genuine BPW air bags.

## ALSO TAKE A LOOK AT OUR OTHER BPW GENUINE SPARE PARTS:

### BPW DRUM BRAKES

Safe in every situation.

- Brake lining wear indicator.
- Wearing edge on brake drum.
- Perfect pairing of brake drums and linings.

# IMPRESSIVE BENEFITS.

Material quality absolutely identical  
to that of the OE parts.

Designed for maximum loading  
according to BPW specification.

Operating temperature from  $-35^{\circ}\text{C}$  to  $+80^{\circ}\text{C}$   
and very high ozone resistance for reliable  
operation in extreme conditions.

## BPW ANTI-FRICTION BEARING GREASE

Expertise ensures long service life.

- Excellent lubricating effect for reduced bearing wear.
- Very good adhesion even at elevated temperatures.
- Highly effective protection against wear prolongs service life of the entire bearing.

- + Perfect fit and simple installation ensures short downtimes.
- + Long service life, verified according to BPW test specification – for low life-cycle costs.
- + Modular spare parts system and use of rustproof pistons for ease of maintenance and economy.

## **BPW DISC BRAKES**

### **Proven dependability.**

- Special BPW brake disc alloy ensures good durability.
- Heat dissipation optimised by enlarged disc surface area.
- Perfect pairing of brake discs and pads.
